  from Techpile Technology

ACHIEVEMENTS

- 2025 – Best App Award, Bizipac: Developed a feature-rich mobile application recognized for excellence in design, functionality, and user experience.

EXPERIENCE

Software Engineer | Bizipac Couriers Pvt Ltd | Mumbai
July 2025 - Present

Worked on ERP, and Food applications using Flutter.

- **Peak Me Apps:** Peak Me is a smart appointment scheduling and document management app for loan and credit card consultancy services. Users can book appointments, securely upload documents, verify identity, and track applications for banks like ICICI, Kotak Mahindra, and airport-related services, with automated reminders to streamline onboarding and enhance client engagement.

Software Engineer | SGTech Technology Pvt Ltd | Noida, India   *Feb 2024- Apr 2025*

Worked on e-commerce, ERP, and Food applications using Flutter.

- **E-commerce Apps:** Developed applications for online product sales with features like cart, checkout, and payment integration.
- **Marketplace Apps:** Built marketplace solutions for managing vendor–buyer interactions in a single platform.
- **Delivery Boy Apps:** Created delivery management solutions for e-commerce and marketplace applications.

Roles & Responsibilities:

- Handled end-to-end development and demos of e-commerce and chat applications.
- Designed and implemented complex Flutter-based solutions with scalable architecture.
- Managed clients from multiple locations, ensuring requirement gathering and smooth delivery.

Key Features Integrated:

- Social Login, Payment Gateways, Push Notifications, Firebase Chat, Socket-based real-time chat, Reward Point System, Wallet, RMA, and Shipping Management.

PROJECTS

• Peak Me Apps - Bizipac

Project Overview: Peak Me is a smart appointment scheduling and document management app for loan and credit card consultancy services. Users can book appointments, securely upload documents, verify identity, and track applications for banks like ICICI, Kotak Mahindra, and airport-related services, with automated reminders to streamline onboarding and enhance client engagement.

• Flutter Food App – SGTech Technology

- Built a cross-platform food ordering app using Flutter, deployed on Android & iOS.
- Integrated Firebase Authentication (Email/Password & Google login) for secure user access.
- Used Firebase Realtime Database for order management and real-time data sync.
- Added Firebase Push Notifications to alert users about order status and promotions.
- Implemented payment gateway integration (UPI/Cards/Wallets) for seamless and secure transactions.
- Optimized REST API integration and state management, improving reliability and reducing crashes by 30%.
- Designed a modern, responsive UI/UX, cutting order placement time by 25% and boosting user engagement.

• E-Commerce Apps - SGTech Technology

- Delivered scalable Flutter-based e-commerce apps integrated with Firebase backend and Razorpay payment gateway.
- Implemented REST API integration, authentication, state management, and push notifications in Flutter/Dart, ensuring smooth performance.
- Customized multi-language, multi-currency, and payment solutions for international clients using Flutter and Firebase services.
